Language

- English
- Filipino

Expertise

- Front-end development (HTML, CSS, JavaScript)
- Back-end development (Node.js, Laravel)
- Database management (MySQL, MongoDB)
- Server-side scripting (PHP)
- Version control systems (GitHub)

Experience

LEE SYSTEM TECHNOLOGY VENTURES - PHP Developer
2011 - 2012

Leveraging PHP as the server-side scripting language, I successfully developed an inventory system for a client in Manila, effectively demonstrating my expertise.

CYBERTEGIC INC. - WordPress/Front End Web Developer
I2012 - 2013

As the responsible individual for the client's website, I continually update it with the latest front-end technologies, ensuring its relevance and delivering cutting-edge functionality.

ISME - WordPress/Back-End Development
2014 - 2015

In my role as a Wordpress developer, I specialize in creating and managing websites, prioritizing security, while implementing custom plugins, themes, and up-to-date technologies such as responsive design.

SJNC - Front-End Developer
2015 - 2016

As a WordPress developer, I skillfully build client websites with React, delivering responsive layouts. Furthermore, I proficiently manage AWS, develop custom plugins and themes, and meticulously ensure optimal website functionality.

SIGWAY HIGGS - Full Stack Web Development
2016 - 2019

During my tenure at the blockchain company, I spearheaded roadmap creation, while developing an intuitive user crypto wallet interface. Additionally, I leveraged cutting-edge web technologies to engineer a compelling desktop browser application, contributing to our competitive edge in the market.

- Responsive web design and mobile optimization
- API integration and development (RESTful)
- UI/UX design principles
- Testing and debugging
- Security best practices
- Performance optimization and caching
- Content management systems (WordPress)
- Frameworks (React, Angular, Vue.js)
- Deployment and server management (AWS, Azure, Heroku)
- Continuous integration and deployment (CI/CD) pipelines.

VIRTUALOMBUDSMAN - Full Stack Web Developer / Server Administrator
2019 - 2022

In my role as a LAMP Stack developer, I successfully managed REST APIs, excelled in plugin and custom theme development, optimized websites for performance and SEO. Moreover, I adeptly handled diverse cloud platforms, ensuring robust security, backups, SSL setup, and seamless mobile responsiveness.

GLOBALSPEX - WordPress Developer/ Server Administrator
2022 - 2023

As a skilled Full Stack web developer, I adeptly managed REST APIs, excelled in plugin and custom theme development, optimized websites for performance and on-page SEO. Additionally, I efficiently handled server management, ensuring website security, backups, SSL setup, and seamless mobile responsiveness.

Education

University of Northern Philippines
Bachelor of in Computer Science
2006 - 2009
